

Reliable magnetite solutions since 1948.

A detailed microscopic image of magnetite crystals, showing their characteristic octahedral and rhombohedral shapes with sharp edges and complex internal textures. The crystals are dark grey to black, set against a lighter, textured background.

Making magnetite one less thing for the world's largest mineral processing and material separation companies to worry about.

We work with you to understand your operations and processes so that we can tailor our product to meet your exact needs.

This paired with our 24/7 technical support, based on 75 years of expertise, and market-leading delivery speed, will optimise your beneficiation processes, reduce your overall magnetite consumption, and give you peace of mind knowing that your magnetite needs are taken care of.

That's why the world's leading mining and processing companies have been buying from us for decades.

With our 24/7 technical support, market-beating availability and guaranteed supply, we take care of your magnetite requirements so that you can focus on your core business.

How we benefit you

1. **Established in 1934** - Around since 1934 and suppliers since 1948, our decades of experience in producing and supplying magnetite means we know what we are talking about – you can count on us for reliable, expert advice and support.
2. **There for you 24/7** - Our responsive, international team means we're there for you when you need us, 24/7.
3. **Product quality you can rely on** - Product quality matters. Ours is among the highest in the world, giving performance you can rely on.
4. **In-house fulfilment** - With in-house production capacity, we can deliver to your precise specs and volumes.
5. **Delivering whenever and wherever you need it** - Through our global, strategic supply chain we can supply you wherever you are in the world, taking care of every step for you.

We'll handle it

Taking magnetite off your plate – orchestrating the magnetite value chain from sourcing to technical support, with an underlying focus on safety.

Sourcing

Our long-term, trusted network of global sources allow us to secure your magnetite supply.

Inbound logistics

Through our established relationships with global logistic partners, and dedicated logistics team, we streamline our costs and pass the savings onto you.

Processing

Our in-house production capacity allows us to deliver to your precise specification and volumes.

Quality control

Our product quality is among the highest in the world. To ensure we maintain this we are ISO9001:2015 accredited, and follow a tight QC process, including on-site laboratory analysis and testing.

Distribution

Through the global Martin and Robson strategic supply chain, we can supply you, when you need it, wherever you are in the world.

Support

We have been processing and supplying magnetite for decades. You can count on us for reliable, expert advice and support to get the most out of our products and your processing facility. Our responsive, international team will ensure we're there for you when you need us.

World-wide magnetite delivery

So that we can supply you with magnetite, wherever you are, Martin and Robson operates on a global scale. We do this through our magnetite plants and network of strategic alliances in Australia, South Africa, USA, Europe, the United Kingdom and other regions.

Specialising in road, rail and ocean freight and international supply chain, our logistics team have been carefully assembled to deliver magnetite on a global scale. They'll take care of everything from despatch to offloading at your site.

A set-up you can count on

Source management, processing experience, and milling facilities designed to guarantee your magnetite supply.

We have honed our processing expertise over several decades, allowing us to produce magnetite of the highest quality. As we work with our customers as partners, we are always happy to apply our expertise onto your site to help you get the most of our product and your processing facility.

Products & Applications

Through our products we offer:

- Various sizing options
- Fe content >62%
- Magnetic content >95%
- Density >4.6kg/cm²

Available bagged (1tonne bulk bags) or in loose bulk.

Supply options include shipping (container or bulk), road and rail.

We have a range of products to suit a variety of applications and industries, including:

- Dense media separation
- Scrap metal recovery
- Civil construction
- Offshore wind construction
- Ship building
- Counterweight
- Water purification

Our parent group

Sturrock and Robson is a global group of industrial companies, which has seen 4 generations of Robson family leaders at the helm. We are proud of our strong values and rich history of building long-term relationships with some of the largest companies in mining, oil and gas, and offshore wind. Through our businesses, we are working towards our vision of becoming a great company, contributing to a better world for future generations.

History

1993 South African expansion

To bring us closer to customers in the main South African coal mining areas, we decided to look for a more strategically placed base. A site was identified at Broodsnyerspass (BNP), Mpumalanga, at the head of what was known as “the coal line” near Middelburg in South Africa. BNP still serves as our main South African operational site today.

1934 The beginning

Martin and Robson was founded by Frank Martin in 1934, joining the Sturrock and Robson Group in 1948. We operated from a milling and storage facility at Gravelotte, Northern Transvaal and a loading facility at the Selati River in South Africa.

2007 Australian expansion

With increasing demand from customers in Australia, we decided to set-up base at a mill in the strategic harbour town of Mackay. February 2008 marked the date of our first sales to our Australian customers, as the first shipment of 28,000 tons of magnetite arrived at the port of Mackay.

2009

The mill

In collaboration with the coal industry, an investment was made in a milling plant at our South African base of Broodsniersplaas, to ensure security of magnetite supply. The mill has enabled us to consistently produce whichever specification is required by our customers, and mitigate against disruptions to supply – even through crises.

Now

A global team

Our team has been ever-evolving to handle the global landscape of our business. 24/7 support to our customers is key for us, so we now have an international team based out of Australia, Mauritius, and South Africa.

2016 Growth

To support our Australian operations, we opened an office in sunny Brisbane. This now serves as the main home for our Australian GM and her team.
